MATARI AGRO INDONESIA

Located in Purwokerto, Central Java, we are present as a trusted partner for agricultural actors to improve the quality and productivity of the agricultural sector in Indonesia. With a focus on comprehensive consulting and training services, we assist in various aspects, from planning to agricultural production. Our commitment to sustainable agricultural development drives us to provide innovative solutions to overcome various challenges faced in the agricultural industry

Our consulting services cover various fields, including plantations, forestry, livestock, fisheries, and marine. Our experienced team of experts is ready to assist in planning and managing agricultural projects with a targeted approach and solutions that suit the needs of clients. We understand the importance of good management in every agricultural sector, therefore, we are committed to providing comprehensive support to individuals, companies, and governments.

One of the main focuses of our consulting services is in agricultural investment planning. We assist clients in conducting market analysis, risk evaluation, and strategic planning to ensure their investments provide optimal results. We also provide consulting services in agricultural management, including natural resource management, pest and disease control, smart farming, and the implementation of sustainable agricultural practices, to maintain the productivity and long-term sustainability of agricultural businesses. With our commitment to provide effective and leading solutions, PT Matari Agro Indonesia is ready to support agricultural players in achieving success and sustainable growth.

TESTIMONY

“Matari Agro Indonesia not only provides technical solutions, but also supports me in developing a sustainable mindset. They taught me about the importance of maintaining the balance of the agricultural ecosystem, so that I can produce healthy and environmentally friendly rice plants.”

Waluyo Sutopo

P4S Sidorejo Kemiri District Purworejo Regency

“With Matari Agro Indonesia, my rice production has increased significantly. They have guided me in implementing effective sustainable farming techniques, as well as providing superior varieties that are suited to local conditions. Now, I can get bigger yields with less risk.”

Waskito

Farmers of Pajerukan Village, Kalibagor District, Banyumas Regency

“With the guidance of Matari Agro Indonesia, I managed to find a rice variety that suited my land conditions. As a result, my rice production increased significantly and the quality was better. In addition, they also helped me in developing market access, so I could sell my harvest at a better price.”

Sarijan

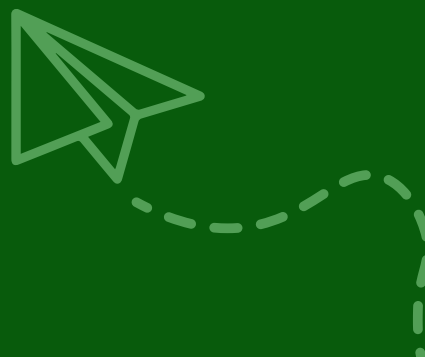

Farmers of Dawuhan Village, Padamara District, Purbalingga Regency

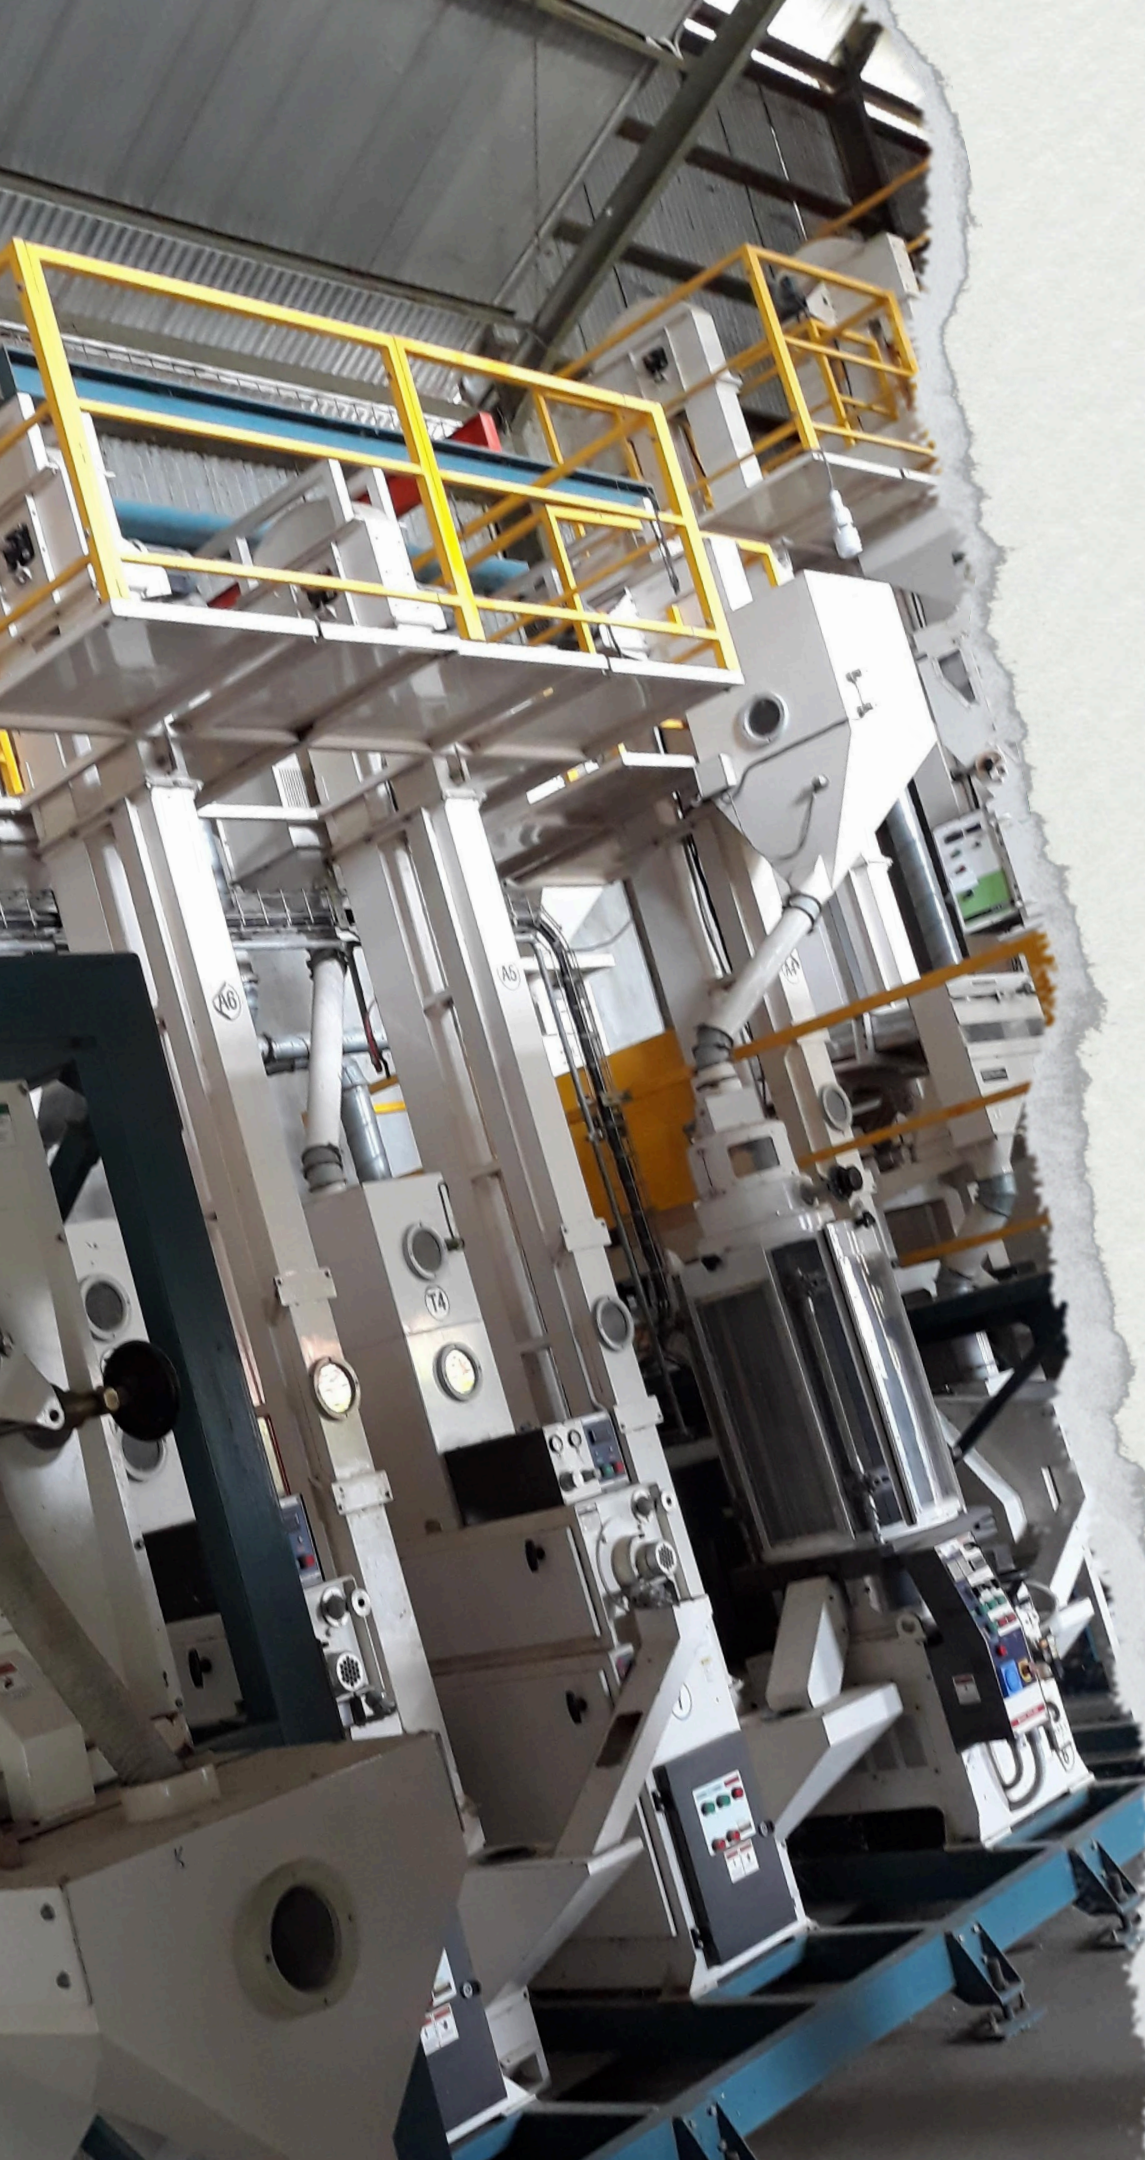

“Since working with Matari Agro Indonesia, I feel more confident in dealing with plant pests and diseases. They provide solutions that are easy to understand and proven to be effective in controlling pest and disease attacks, so that I can maintain optimal harvest results.”

Wiwit

Farmers of Sokawera Village, Padamara District, Purbalingga Regency
